-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 9-11 are pending.

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The following issues remain at this time.

Claim interpretation

2. The following interpretation is presented for the remaining issues in this Official Office Action. The claims are directed to an aerosol composition prepared from a biliquid foam, an aqueous phase and a propellant. The instant case is a continuation-in-part of the application of application serial number 10/288,590. The instant application includes the following subject matter not set forth in 10/288,590:

Page 1, last ¶ ;
Page 2, 1st ¶ ;
Page 7, line 13, to page 9, line 13;
Examples 11-14, page 14, line 31, to page 16, line 27.

The scope of the instant claim 9 includes subject matter with an effective date of the instant filing date of November 6, 2003 including instant examples 11, 13 and 14 employing carbomer.

Applicants have filed a Declaration under 37 CFR 1.131 on June 27, 2006 and resubmitted on September 15, 2006 with documentary evidence to show the date of invention precedes that of the references.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1712

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 is deemed to be incomplete since said claim is an aerosol composition and comprises biliquid foam, an aqueous phase, and propellant. Said aerosol composition "which is a polish, an air freshener, a repellant, a pre-shave preparation, a post-shave preparation, a shaving preparation, or a follicle softener". Each of said alternative compositions require the addition of further unclaimed but disclosed ingredients other than the biliquid foams. It is unclear what are the metes and bounds of the claimed subject matter sought for patent since the claim does not require any further ingredients. It is unclear whether the biliquid foam functions as "a polish, an air freshener, a repellant, a pre-shave preparation, a post-shave preparation, a shaving preparation, or a follicle softener" when in aerosol form with water and propellant or requires the addition of further ingredients.

Furthermore, the alternative grouping contains multiple use of "or".

Allowable Subject Matter

5. Claims 10-11 are allowed.

Response to Arguments

6. Applicant's arguments with respect to claim 9 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1712

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Particular attention is directed to Sandvick, US 4,810,407, examples and column 9, lines 12-28, which disclose the aerosol polish compositions. Sandvick lacks a teaching of biliquid foams in the aerosol.
